

TAROM Environment Policy

S.C. Compania Națională de Transporturi Aeriene Române TAROM S.A. understands that the climate change is real and needs immediate actions.

We embrace the goal adopted by the international community for the world to become „green” by mid-century. We make efforts and allocate resources to achieve an ambitious goal of zero greenhouse gas emissions by 2050.

We look to preserve the world for the generations to come, using new technologies, collaborating with our customers and partners, encouraging people to innovate.

We strive to protect the environment and to reduce the footprint by:

- Complying with regulatory requirements;
- Operating environmental efficient procedures;
- Reducing the waste our activities might generate, safe recovery and disposal;
- Promoting environmental awareness among our employee, customer and partners.

We are committed to continuously improve our performance to reduce the risks for the environment resulting from our operations.

Cristian ANGHEL
CEO and Accountable Manager
